Major in Information Technology

### Sandip Polytechnic, Nashik

Diploma - 91%

July 2017 - May 2021

Major in Computer Engineering

## PROJECT

---

### AI Based Missing Person Search System

- The proposed system helps the police and the public by accelerating the process of searching using face recognition.
- When a person goes missing, the police upload a picture of the person which is stored in the database. When anybody encounters a suspicious person, they capture and upload the picture of that person into the portal.
- The system maintains the database of all the missing people and whenever a match is found appropriate authorities in that area are notified.

### Campus Selection System

- This system automates the Selection process activities that the HR Department has to perform prior to and after the actual act of selecting the students.
- This system helps in various ways such as saving time and cost of selecting Students and companies
- That set of concepts is used to build a system for easily Communication between students and companies and company can get required eligible students.
